

Scopus Training Session

A database for efficiently finding high-impact articles

【Presenter】 (Elsevier Japan)

Wednesday, 30th November, 2022

This workshop is in English. ★ Reservations Required

Hours	Style
15:10-16:10	Online Seminar via Zoom After your application, we will let you know how to access the workshop.

This workshop is **for Osaka University Members only.**

Topics

- ☆ What is Scopus?
(comparing with other Databases)
- ☆ Basic search workflow.
- ☆ Find High-impact articles.
- ☆ Search for Authors.
- ☆ Check journal metrics.

Find the latest articles about your research topic

Find important articles based on citations

Check the author profile of a top researcher

Select a journal to publish with

What is Scopus?

Scopus is the largest abstract and citation database for peer-reviewed literature covering the fields of science, technology, medicine, social science, and arts and humanities. Scopus also covers 100% MEDLINE. It can be used not only for literature search but also for performance evaluation of researchers and research institutions, for example, World University Ranking, THE or QS use the citations of Scopus data. After this training, you can decide which journal to be submitted by journal metrics or manage your research achievement by the author profile using Scopus.

Please apply at the library's website.
